PROJECTS

Restaurant Order Management System

March. 2026 - Ongoing

Tech Stack: [HTML](#) | [CSS](#) | [JavaScript](#) | [PHP](#) | [MySQL](#) | [XAMPP](#)

[GitHub](#) | [Live Demo](#)

- Built a full-stack restaurant platform where customers can browse the menu, add items to a cart, place orders, and reserve a table all from a single page with OTP verified phone authentication.
- Implemented a secure order pipeline with CSRF protection, session-based cart management, OTP verification with expiry and rate limiting, and auto-generated downloadable PDF invoices on order confirmation.
- Developed a centralized Admin Dashboard to manage menu items, monitor live orders, handle table bookings, upload gallery images, and control admin accounts with role-based access.

Online Gaming Site

July 2025 - September 2025

Tech Stack: [HTML](#) | [CSS](#) | [JavaScript](#)

[GitHub](#) | [Live Demo](#)

- Built a fully responsive single-page gaming website using HTML, CSS, and vanilla JavaScript with anchor-based navigation linking Home, About, Media, News, Purchase, Social Media, and Contact sections.
- Designed a purchase section with dropdown selectors for country, platform, and game edition, and a community section displaying member avatars with a Join Our Community call-to-action and a Play Store download banner.
- Implemented a CSS media query responsive layout across breakpoints from 575px to 1200px, an autoplay background video hero banner, a mobile hamburger nav with overlay toggle, and a scroll-triggered go-to-top button via JavaScript event listeners.

Portfolio Website

May 2025 - Ongoing

Tech Stack: [HTML](#) | [CSS](#) | [JavaScript](#)

[GitHub](#) | [Live Demo](#)

- Built a single-page personal portfolio using HTML, CSS, Bootstrap 4, and vanilla JavaScript with AOS scroll animations, a typewriter effect cycling through role titles, and a scroll-triggered navbar style change for a polished user experience.
- Designed a projects section with Bootstrap card components showcasing Car Rental Agency, SkateX Gaming Site, Spotify Frontend Clone, Currency Converter, and Simple Calculator, each with links to the GitHub repository and live site.
- Included a tech stack section displaying C++, Python, HTML5, CSS3, Bootstrap, JavaScript, React, Node.js, Firebase, jQuery, Redux, and MongoDB as icon logos, alongside a skills writeup covering front-end and MERN stack development with a resume download link.

SKILLS

Languages:

C, C++, Python, JavaScript, PHP, SQL

Frontend:

HTML5, CSS3, JavaScript (ES6+), React (Learning)

Backend & Database:

PHP, MySQL, XAMPP

Cloud & Tools:

Git, GitHub, VS Code

Concepts:

OOP, REST APIs, Responsive Design, Database Design

EDUCATION

Khwaja Moinuddin Chisti Language University, Lucknow

B.Tech in Computer Science and Engineering |

June 2025

Current CGPA: 7.76/10

Mahamaya Polytechnic of Information Technology, Kanpur Dehat

Diploma in Civil Engineering |

June 2022

Percentage: 74.14%

Gyan Sthaly Public Inter College, Jhansi

High School (10th) |

Feb 2019

Percentage: 88.5%
